

Spencer Weston, MD
2021 WMS Secretary/Treasurer – Personal Statement

I am a father of 4 incredible kids and finishing this last year as the Wyoming Academy of Family Physicians President. I love the great State of Wyoming and am dedicated to providing the best care possible for patients, leading positive change in healthcare, and doing what I can to ensure medicine is sustainable well into the future.

Thank you for the opportunity to serve as Wyoming Medical Society treasurer. I have been appreciative of the kindness, mentorship, and examples of hard work, dedication, and friendship you all have shown me as colleagues over the years. I am passionate and committed to removing obstacles that prevent physicians from providing quality care to their patients.

2020 led to some very big changes and certainly did not turn out like anyone would have expected. Last year I moved from private practice into the employed sector as several forces pushing physicians into employed positions finally left me with limited choices for the sustainability of my medical practice in Wyoming. I think the lessons learned in the process will be beneficial for WMS as we move forward.

I want to be a source of support that all physicians can lean on to help improve the ability to care for our patients. I want to be a strong advocate for you, in whatever practice you find yourself, to move you toward security and sustainability in your practices.

At the end of the day, you should be home with your families and friends, not trying to make up for system inefficiency or problems outside of a physician's control.

I would be honored to serve as your treasurer.
