

Rebecca Franklund, MD

Personal Statement

I have been honored to care for the community of Sheridan, Wyoming since 2013. My husband and I have three children, 10, 7 and 3. We also enjoy our horses, cows, sheep, chickens, dogs, cats, fish and frogs while chauffeuring our children to their various activities.

My goals from humble beginnings in North Dakota have always including bringing excellence to rural medicine. Being a specialist in the broad, integrated medical and surgical care of women's health has provided me a unique perspective in addressing health care issues. I hold fast to the ideals that our patients deserve physician led care and interference in the patient-physician relationship is unacceptable.

The Wyoming Medical Society has successfully created physician allies despite our vast and sparsely populated state, diverse specialties and divergent political affiliations and those relationships are invaluable in continuing to shape healthcare in our hometowns, hospitals and state. Thank you for the opportunity to participate in the Wyoming Medical Society.

Respectfully,
